**Appendix B-10**
**REVIEW QUESTIONS FOR U1 CORE Respirator Knowledge TRAINING for the COVID-19 Response**

Name: _____     Date of Hire: _____

Position/Job Title: _____

Parish/School/Archdiocese of Employment and City: _____

I, _____,  acknowledge receiving and completing the following review form

_____        _____
Employee's Signature                                                                  Date

_____        _____
Supervisor                                                                              Date

*Before completing this review, make sure you view the U1 Core Respirator Knowledge Training available on the Archdiocese of Seattle website. Please circle <u>one</u> answer to each of the questions below.*

1-Before being able to use a respirator one must have a valid Authorized Respirator User Card?  (AKA a valid Golden Ticket?)                                                                                                **Yes**              **No**

2-A valid Authorized Respirator User Card expires one year after being issued?  **Yes**              **No**

3-My Authorized Respirator User Card becomes NOT VALID and I need a new one if:
I want to use a different type of respirator but do not have that endorsement?  (example: Have N95 endorsement but now want to use a PAPR)                                                                **Yes**              **No**

4-My Authorized Respirator User Card becomes NOT VALID and I need a new one if:
I change to using a different brand, model or size of respirator than what is on my Authorized Respirator User Card Endorsement  (example: Change from using a 3M brand 8210 Model Medium Size N95 Respirator to a FLTR brand Model Medium N95 Respirator)                                                                     **Yes**              **No**

5-A place I can always go to review training modules, review the Archdiocese's Respirator Program and find out who to contact if I have questions is the Property and Construction Website at www.archseattle.org/office-or-ministry/property-construction/                                                                              **Yes**              **No**

6-A negative pressure respirator (Tight fitting such as  an N95 or Half-Face)  to provide protection requires having a good seal on the face.   This includes not having facial hair that contacts where the seal is made to the face?
                                                                                              **Yes**              **No**

7-An N95 respirator is the minimal type of respiratory protection for all four scenarios that OSPI/L&I/DOH jointly require respirators to be worn?                                                      **Yes**              **No**

8-The air filtering respirators we are using DO NOT remove toxic chemicals, particularly carbon monoxide, from the air.                                                                                               **Yes**              **No**

9-My Authorized Respirator User Card becomes NOT VALID and I need to contact the Archdiocese Respirator Program administrator to learn if I need a new medical clearance if I have a health change that effects my lungs and/or my heart.                                                                                             **Yes**              **No**

10- One should <u>never</u> use a cleaning or disinfecting chemical on the filter media of a respirator, and only use it sparingly on the hard components?                                              **Yes**              **No**

**Note: This form is to be filed in the Employee's personnel file**
